(508) · 479 · 7185 cjriek123@gmail.com

[GitHub](#) • [Website](#)

TECHNICAL STRENGTHS

Programming Languages	Objective-C, Swift, Python, HTML, CSS, Javascript, C++
Protocols & APIs	Cocoapods, Beautiful Soup, Firebase, Node.js
Tools	Git/GitHub, XCode, Sublime Text 2

EDUCATION

Wheaton College, Norton, MA
Major: Computer Science

Graduated: May 2014

PROJECTS

THVideoFaceSwapper

- A live face swapping iOS app developed using [openFrameworks](#). It swaps your face in the video with a face you choose from the set of preloaded images or an image you take with your camera. [GitHub Blog Post](#)

NOGGIN App

- Viacom's first subscription-based app made for Nickelodeon. It has been featured in the App Store under the Kids (5 and Under) and Education sections. It was also featured under Best New Apps upon launch. [App Store Website](#)

RZDebugMenu

- An in-app debug menu that injects setting changes during runtime. Settings (as defined in a Settings.plist) and actions for a setting are defined by the developer and can be added to the Debug Menu's built-in observer. The menu handles the changes accordingly. This is a great alternative to a Settings.bundle. A use case is to be able to turn onboarding on and off during debugging. In the Top 200 Cocoapods ranked by popularity. [GitHub](#)

cowDuck iPhone App

- Wheaton College application for students. Provides the campus directory/map, dining hall menus, transportation schedule, course selection schedule, and the events calendar. Currently under development for iOS 8 support.

Lexomics

- In charge of updating the UI components and front-end code including, but not limited to, converting XMLHttpRequests to jQuery ajax calls and adding new functionality (e.g. Select All and Delete buttons) [Website](#)

TECHNICAL EXPERIENCE

The Hackerati

iOS Developer

December 2014 - Present

NYC, NY

- Contributed major functionality and new UI to the existing SOLS medical app (SOLS Rx), and helped lead the development of the new consumer app written entirely in Swift.
- Reestablished the NOGGIN brand for Nickelodeon via the NOGGIN App, a subscription based application. This app was the first of its kind for Nickelodeon and Viacom and pushed them into the cord-cutting market for the first time.
- THVideoFaceSwapper: A live face swapping iOS app developed using [openFrameworks](#). It swaps your face in the video with a face you choose from the set of preloaded images or an image you take with your camera. [GitHub Blog Post](#)

Imprivata, Inc

iOS Developer

October 2014 - November 2014

Lexington, MA

- Designing and implementing the company's first iOS application for their OneSign product, OneSign Mobile.

Raizlabs

iOS Developer

June 2014 - October 2014

Boston, MA

- Contributed to collection of open source software with RZDebugMenu, a cocoa pod that allows developers to change different, observable elements and variables at runtime.
- Contributed to iOS screen recording SDKs for the largest UX testing service.

- Contributed to the consumer iOS app for one of the largest eLearning companies in the world.

Wheaton College

Teacher's Assistant

January 2013 - December 2013

Norton, MA

- Taught students core programming concepts such as, but not limited to, control flow, functions and various mathematical operations in Python
- Taught students the fundamentals of object oriented programming and design outside of class

Liberty Mutual

IT Intern, Product and Policy Administration

May 2013 - August 2013

Dover, NH

- Supported and maintained three internal and large scale applications for the Commercial Insurance Line utilizing Java, MySQL and CVS (for version control)
- Conducted code fixes and backend data changes on large scale production environments to meet the new business requirements of the customer and company
- Swiftly produced and pushed efficient resolutions for code defects and issues while still addressing the needs of the business

Liberty Mutual

Business Systems Analyst Intern

May 2012 - August 2012

Boston, MA

- Created and updated six tools for the Underwriting Division using Visual Basic and Microsoft SQL. These tools functions ranged from updating databases, generating reports for the actuarial department and gather large data sets over multiple databases for users
- Designed the GUI of the tools, optimized previous code and generated new code from scratch for new tools
- Increased the efficiency of data searching and updating of multiple databases
